Format   LIST

                LIST "device name"

                LIST "device name":line length:start line-
                end line

Description

The LIST command is the same as per Extended Basic Manual
page 114. The LIST routine has been modified to allow the
line length to be output to a device. The line length can
only be used if a device is specified. A colon (:) must
follow the line length. If not included in the LIST
command, the line length is set to the default of the
specified output device.
The line length can range from 1 to 255. If the length
specified is outside this range, a Bad Line Number Error is
reported.

Command

This line outputs to a device.| >LIST "PIO":80:100-120
                              |
This line outupts to a device.| >LIST "RS232.BA=1200":132:
                              |
This a dummy line. | >100 ! TEST OF LIST
Another dummy line. | >110 ! TEST OF LIST
                              |
