Format   CALL ROLLUP

                CALL ROLLUP(repetition)

Description

ROLLUP scrolls screen to the up so repetition will
repeat the scroll number of times to up.
Repetition can be 1 to 65535 max. ROLLUP runs from ROM.

Programs

```
Roll screen up 2 times      | >CALL ROLLUP(2)
                            |
Prints line                 | >100 PRINT "SCREEN PRINT"
Roll screen UP              | >110 CALL ROLLUP
Repeat the program          | >120 GOTO 110
                            |
Load X$ string variable     | >100 X$=" SCROLL UP"
Print X$                    | >110 PRINT X$
Roll up 9 times use X$      | >120 CALL ROLLUP(9)
Repeat the program          | >130 GOTO 100
```

Options
New features allow for some special that can take the place
of some routines that are slower in XB.
