Description

 The CAT command catalogs the disk drive indicated by the
which can be 1 to z or by path name. The path name may be
up to 30 characters long. A numeric variable or number can
be used for drives 1 to 9 or if higher then it is assumed
that the numeric-variable or number is a ASCII value between
30 to 255. This allows a catalog of a RAM-DISK designated by
letters or control characters. Also CAT can catalog up to 32
drives in one command. The SPACE BAR will pause the catalog
routine, then when the pressed again continues the catalog
listing. ANY OTHER KEY WILL ABORT THE CATALOG.
